

# Fire Evacuation & Community Cat Care

1

## Microchip Information

Make sure cat's microchip is updated with your current contact information.

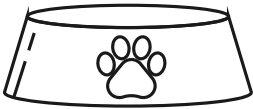

2

## Have a Current Photo

Have a current picture of your cat/s to help with identification.

3

## Feeding

Leave out as many large bowls of water for your cats, as well as food in several different spots for them to locate.

4

## Leave Cats Outside

DO NOT lock your cats inside any building/home or cage. Cats are incredibly smart about getting to safety and will most likely find a safe spot if we let them.

5

## Returning Home

Once you can safely check on your home, bring food and water for your cat/s. Even if you don't see them, they are likely nearby and can return after the chaos settles.
